Digga Pallet Forks - The safest on the market

Our floating tyne design offers unparalleled safety for skid steer loaders. Unlike forklifts, skid steers are able to crowd their pickup past horizontal allowing the machine to be placed in an unsafe position which could cause it to tip over. Digga's pallet fork design allows the tynes to swing freely from a single lockable point ensuring load and operator safety. Furthermore the design prevents the machine's weight to be placed on the tynes which could cause them to break.

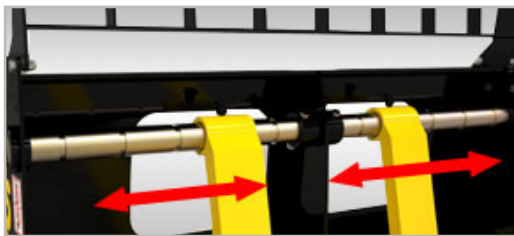

FIXED TYNE
PALLET FORKS

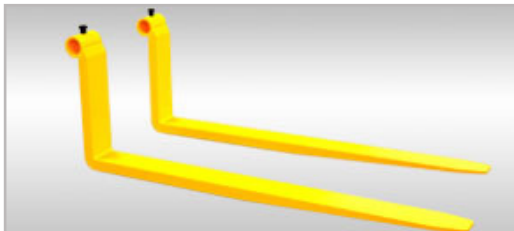

DIGGA FLOATING
PALLET FORKS

IF YOU CARE ABOUT SAFETY THEN A
FLOATING TYNE DESIGN IS THE ONLY
SAFE CHOICE FOR SKID STEER LOADERS

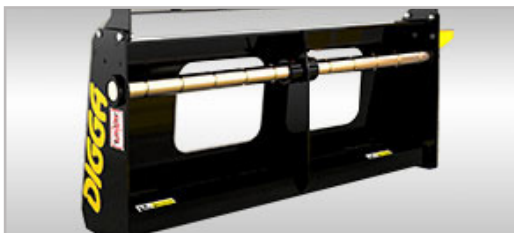

■ TYNE BAR LOCKING SYSTEM
